

## **BDSP's training program has completed its first 15 days (18<sup>th</sup> Oct 2021)**

BDSP's training program has completed its first 15 days in collaboration with GLPC (Government of Gujarat). From conversing about their entrepreneurial ideas to training them to be experts in their fields, our teachers have been giving their best. After fifteen days of training, these trainees still were as enthused as they were when they first arrived in the city. Modules of teaching focus on developing soft skills and hard skills that revolve around science, commerce, and social understanding. The aim of this training is to build leaders of the future, who will protect and strengthen their communities to provide a sustainable livelihood for themselves. Along with it event named “Strepreneurship” was organized in order to promote Women Toward Sustainable Growth and Development. This is just the beginning of this training we have a vast vision for this program.
